Race UP is the Formula SAE Team of the University of Padova. Every year the team set the ambitious goal of conceiving, designing, manufacturing, testing and presenting two cars (one with electric and one with hybrid engine) that compete against other Universities in this international design competition.

1001VelaCup is an interdisciplinary project open to all students of the University, which consists in designing, building, experimenting and racing a sailboat of 4.60 meters with at least 70% of natural materials. The University of Padova Mètis Vela Team takes part in the 1001VelaCup race.

The Lift UP project was born in 2017 in the University of Padova, with the aim of participating in the AirCargoChallenge 2019. The project has grown to 40 members from all the faculties of the University of Padova, primarily from the aerospace engineering course.

The goal of Quartodilitro Team is to build a winning and performing motorcycle prototype, continuing the tradition of excellence in the motoring field of the University of Padova.
